ACTIVATES

the International Two-Year Second level Master in “Aesthetic Medicine and Therapeutics” (class of Rome, English language course)

GOALS AND OBJECTIVES

Cosmetic medicine has of late become an important reality in medicine and in society at large. The culture of medicine of wellness, so pervasive in industrialized Western society, risks presenting consumers with inadequate or superficial information that often leads to “do it yourself” remedies that may be ineffective or even harmful.

In this context, advanced university formation provided by pre-eminent figures in the sector who work on an international or national level, would afford safeguards for consumers and offer the high level of quality that should be the ambition of a public university.

A unique characteristic of the Master, developed to meet the needs of working physicians, is its e-learning format for the theoretical part of the program. The face-to-face and practical parts of the formation will be conducted in a series of intensive internships coordinated in collaboration with the International Radio Medicine Center in Rome.

PROFESSIONAL PROFILE

The Master provides high level formation of international and namely of European level for professionals who will work in their own studios, multispecialist centers, wellness centers, gyms, spas or hotel

complexes with specialized sports and health and beauty facilities, as well as in companies that develop and manufacture products for the sector.

TEACHERS OF THE MASTER

Teachers of the Master enrolled after a public selection and winners of this selection are listed below. Francesco Amenta, Anna Carotenuto, Carlo Bisacci, Andrea Corbo, Maurizio Fraticelli, Alessandro Gennai, Marco Laureti, Mario Leonzi, Giovanni Manzo, Luca Piovano, Irina Poleva, Fabio Sibilio, Sonia Suppressa, Enea Traini, Vincenzo Varlaro.

STRUCTURE OF THE MASTER

The Master is composed of 21 units, each of which is in turn formed of one or more modules, for a total of 33 modules. A module includes a series of lessons, most of which employ e-learning, and a library in which learners can find carefully selected reference material that would otherwise be difficult to obtain. Each module is followed by an on-line test; once this test has been passed, the student may access the following modules.

In addition to modules, there will be *case studies* that focus on some practical aspects of the management and practice of cosmetic medicine.

After the first and second year of the Master and before presentation and defence of the thesis, the student must pass a face-to-face exam on the fundamental content of the program of studies. At the end of the

Master, the student must presents and discuss her or his Master's thesis, as one of the requirements to earn the degree.

At the end of the program, participants will receive the two-year university level two Master degree.

THE MASTER PROGRAM ABROAD

In line with the international vocation of the Master, which is organized in collaboration with the European Medical Association (EMA), it will be activated in other nations of the European Union, in order to provide an offering that meets the needs of international users.

Actually, Master is activated in Rome in collaboration with C.I.R.M and in Athens (Greece) in collaboration with Venus Medicine.

INTERNSHIP (*obligatory*)

In addition to face-to-face lessons, e-learning and practical activities, there will be a six week internship each year in Rome at the International Center for Radio Medicine (C.I.R.M.)

ADMISSION REQUIREMENTS

The Master is open to applicants who are employed, unemployed, or have never been employed, and who have a degree in Medicine and Surgery, earned in at least five year program, a license for medical practice and membership in the appropriate professional registers or, for foreigners, equivalent organization.

All participants in the Master must have the computer skills and familiarity with internet use needed to follow the interactive e-learning lessons. They must have a multi-media personal computer with broadband service, and possess good knowledge of scientific English.

Enrolment in the Master is not possible for those who in this academic year are already enrolled in an undergraduate, master, specialization, or doctoral degree program, or another course involving a year-long commitment (Legge 270/04, art. 5, c. 2).
