

PERSONAL INFORMATION

Alessia Cappelli

WORK EXPERIENCE

December 2017-May 2019

Temporary Research Fellow

Prof. Guido Favia, Laboratory of Parasitology, University of Camerino (guido.favia@unicam.it)

Research project MIUR-PRIN 2015 "Symbiosis in protozoa and insect vectors: from basic research in environmental"

Employed in the characterization of the bacterial community related to parasite of the genus *Plasmodium*. Preliminary studies by DGGE and 16S MiSeq analysis were performed on malaria patients sera and *Plasmodium falciparum* cultures in order to detect the possible bacteria associated with malaria parasite. FISH experiments were performed in collaboration of the Istituto Superiore di Sanità (Roma) to localize the bacteria in *P. falciparum* cultures.

I designed the experimental plain and performed the experiments.

December 2012-May 2017

Temporary Research Fellow

Prof. Irene Ricci, Laboratory of Parasitology, University of Camerino (irene.ricci@unicam.it)

Research project IDEAS Programme ERC Starting Grant "Yeasts symbionts of malaria vectors: from basic research to the management of malaria control"

Employed in the study of main characteristics of the killer toxin (KT), a protein produced by the symbiotic yeasts *Wickerhamomyces anomalus* isolated from vector of malaria *Anopheles stephensi* mosquitoes. The anti-microbial activity of KT was assess *in vitro* and *in vivo* against the malaria parasite, *Plasmodium*.

I designed the experimental plain and performed the experiments.

July 2009 – July 2012

Postdoctoral Fellow

Prof. Guido Favia, Laboratory of Parasitology, University of Camerino (guido.favia@unicam.it)

Research project FIRB-IDEAS "Assessment of the potential role of bacteria of the genus *Asaia* as microbial agent for paratransgenic control of malaria vectors"

Employed in the study of the symbiotic relationship of bacteria of genus *Asaia* with mosquitoes vectors of diseases as malaria, dengue, yellow fever, zika virus.

The role of *Asaia* was investigated with molecular techniques, immunostaining assays and *in vivo* experiments.

I designed the experimental plain and performed the experiments.

EDUCATION AND TRAINING

2017 Exam committee member for Parasitology
University of Camerino, Italy

16-17 July 2012 INFRAVEC Workshop. Bioinformatic Workshop for Vector Biologists.
Hinxton, Cambridge, United Kingdom

- 6-11 July 2009 *Reducing Plasmodium transmission and malaria burden by integrated vector control A multi-disciplinary and multi-cultural training workshop.*
Camerino, Italy
- 2006 - 2009 **Ph.D in Environmental Sciences and Public Health XXI cycle - Development of Biotechnology for Environmental Sciences and Public Health**
Title of thesis: "Development of a diagnostic procedure for genetic analysis of genes involved in Monogenic Diseases with autosomal dominant inheritance (MODY2, MODY3 and CADASIL)"
(Supervisor Prof. Cristina Miceli and Dott. Luigi Pianese).
University of Camerino, Italy
My Ph.D. was supported by a convention between the ASUR ZT13 (Ascoli Piceno) and the Doctoral Course in Environmental Sciences and Public Health (University of Camerino). I worked at Molecular Medicine Laboratory of U.O. Clinical and Microbiology Laboratory (ASUR ZT13, Ascoli Piceno), established in 2006 with the aim to become a regional reference centre for the molecular diagnosis of monogenic disease with autosomal dominant inheritance, as some forms of diabetes in young patients, Maturity Onset Diabetes of the Young type 2 and 3 (MODY 2 and 3), and a form of vascular dementia, the cerebral autosomal dominant arteriopathy with subcortical infarcts and leukoencephalopathy (CADASIL).
I developed the diagnosis assay for each pathology and performed the molecular diagnosis of all patients from DNA extraction to data analysis.
- Jan-Sep 2007: **English Course**
Wall Street Institute, Ascoli Piceno, Italy
- November 2006 **Authorization to practice the profession of Biologist**
University of Camerino, Italy
- 02-06 October 2006 **Stage at "Laboratorio di Neuropatologia del Policlinico Gian Battista Rossi**
Verona, Italy
- 2003 - 2005 **Master Degree in "Molecular Biology"**
Title of thesis: "Espressione e funzione del recettore TRPV1 in tumori uroteliali umani"
Grade:110 cum laude - University of Camerino, Italy
- 2000 - 2003 **Degree in "Biology" (3 years)**
Title of thesis: "Analisi dell'espressione dei recettori neurochininici e vanilloidi nei timociti di ratto mediante real-time PCR"
Grade: 110 cum laude - University of Camerino, Italy
- July 2000 **Maturità scientifica**
Grade: 82/100- Liceo Scientifico "A. Orsini", Ascoli Piceno, Italy

PERSONAL SKILLS

Mother tongue(s) Italian

Other language(s)	UNDERSTANDING		SPEAKING		WRITING
	Listening	Reading	Spoken interaction	Spoken production	
English	B1	C1	B1	B1	C1
Replace with name of language certificate. Enter level if known.					
Levels: A1/A2: Basic user - B1/B2: Independent user - C1/C2 Proficient user Common European Framework of Reference for Languages					

Communication skills	Ability to work with colleagues from different countries															
Organisational / managerial skills	I am able to independently organize my work and the work of my colleagues and students. I have followed the laboratory activity of undergraduate, graduate and PhD students.															
Job-related skills	<p>Molecular Biology: acid nucleic extraction, qualitative and quantitative PCR, acid nucleic and protein electrophoresis; Western Blot, DGGE, Sanger sequencing; cloning with traditional and expression vectors, IFA, FISH.</p> <p>Cellular Biology: maintenance of primary cell cultures and immortal cell lines cell in selective culture medium; counting cells using a microscope counting chamber; isolation and extraction of Rat Thymocytes using Ficoll protocol; FACS; MMT and SRB assay, killer activity assays of toxic proteins.</p> <p>Microbiology: Bacteria and yeasts cultures in universal and selective medium, isolation of bacteria and yeasts from insects.</p> <p>Insectary competences: maintenance of several strain of mosquito (<i>Anopheles stephensi</i>, <i>An.gambiae</i>, <i>Aedes albopictus</i> and <i>Ae. Aegypti</i>, <i>Culex pipiens</i>, <i>Cx. quinquefasciatus</i>), colonization of mosquito using wild type and genetically modified bacteria and yeasts. Ability to maintain the life cycle of <i>Plasmodium berghei</i> in the murine model.</p> <p>Excellent use of the Instruments: Automated DNA Extraction Systems, Automated capillary Electrophoresis, Spectrophotometer, qPCR,</p>															
Digital competence	<table border="1" style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th colspan="5" style="text-align: center; padding: 2px;">SELF-ASSESSMENT</th> </tr> <tr> <th style="padding: 2px;">Information processing</th> <th style="padding: 2px;">Communication</th> <th style="padding: 2px;">Content creation</th> <th style="padding: 2px;">Safety</th> <th style="padding: 2px;">Problem solving</th> </tr> </thead> <tbody> <tr> <td style="padding: 2px;">Independent User</td> <td style="padding: 2px;">Proficients</td> <td style="padding: 2px;">Proficients</td> <td style="padding: 2px;">Independent User</td> <td style="padding: 2px;">Independent User</td> </tr> </tbody> </table> <p>Levels: Basic user - Independent user - Proficient user Digital competences - Self-assessment grid</p> <p>Operating Systems: Windows Word Processing: Office (Word, Excel, Power Point) Databases and softwares for sequence analysis: Sequence analysis software, SeqScape software, Chromas, NCBI, Ensembl, HGMD data base, VectorBase) Scientific Graphing: GraphPad Prism, MxPro, Bio-rad CFX Manager Basic Knowledge of Bioinformatics (Blast, ClustalW, etc.)</p>	SELF-ASSESSMENT					Information processing	Communication	Content creation	Safety	Problem solving	Independent User	Proficients	Proficients	Independent User	Independent User

ADDITIONAL INFORMATION

Brief track-record**Research interests**

General and molecular parasitology, genetics, microbiology, cellular biology, molecular biology (and their applications), study of symbiosis in mosquito vectors.

Publications:

17 articles in international journals (2 as first and corresponding author and 4 as first author), 1 chapter of book and 13 abstract in journal (two of them published in European Journal of Human Genetics Supplement), 7 Poster in Congress (two awarded with honours).

Bibliometric indices:

Scopus: H-index of 8 with 231 citations; Google Scholar: H-index of 10 with 326 citations. My ORCID ID is: 0000-0003-4553-9360.

Publications in progress:

Cappelli A, Valzano M, Cecarini V, Bozic J, Rossi P, Mensah P, Amantini C, Favia G, Ricci I. Killer yeasts exert anti-plasmodial activities against the malaria parasite *Plasmodium berghei* in the vector mosquito *Anopheles stephensi* and in mice. **Submitted to Parasite & Vectors**

Cappelli A, Damiani C, Mancini MV, Valzano M, Rossi P, Serrao A, Ricci I, Favia G. Interactions between Asaia and mosquito immune system: implications in malaria control. **Submitted to Frontiers in Genetics**

Teaching activity:

I was co-supervisors of 22 undergraduate students of the bachelor in Biology and Biosciences and Biotechnology, 10 students of the Master degree in Biology and 7 PhD students. I have been "teaching assistant" in the Laboratory practice course for the Bachelor Program in Biosciences and Biotechnology.

Review activity:

I have been serving as referee for the journals: Recent Patents on CNS Drug Discovery, Neurology International, International Journal of Insect Science, Gene, Diabetes Research and Clinical Practice and Ecological Genetics and Genomics.
