

Miller Zambrano

PERSONAL STATEMENT:

A Geoscientist holding a PhD in Earth Sciences from the University of Camerino (Italy) and a Degree in Geophysical Engineering from the Central University of Venezuela with experience in petroleum exploration. Fields of interest: structural geology, seismic data analysis, fracture modelling and fluid flow simulation.

EDUCATION:

2012 – 2016 | **PhD Earth Sciences** in “*3D multiscalar geological models and fluid flow simulations in deformed rocks*” | University of Camerino. Italy

- The research was focused on geological modelling and fluid flow in deformed porous and tight carbonate rocks by using of different methods, such as fracture modelling, field structural geology, fluid flow simulation, X-ray microtomography of porous rocks and computational fluid dynamics.

2002 –2008 | **Geophysicist Engineer** | Central University of Venezuela

- The followed courses included general geology and applied geophysics. The dissertation thesis, approved with honours, was focused on seismic interpretation in an area of the Maracaibo Basin. The results of this study brought insights to new exploration possibilities within the basin.

WORK EXPERIENCE:

Sept. 2016 – Dec. 2016 | **Research Grant** | University of Camerino. Italy

- The research aimed to develop computational fluid dynamics simulations (Lattice-Boltzmann method) in deformed porous carbonates using high resolution X-ray microtomography images.

Dec. 2015 – Feb. 2016 | **Research Grant** | University of Camerino. Italy

- The main goal of this study was to characterize and model natural fractured carbonate reservoirs.

Jul. 2015 – Sept. 2015 | **Erasmus Traineeship** | Heat and Mass Transfer Technological Center-Polytechnic University of Catalonia. Terrassa, Spain

- Activities were concentrated on computational fluid dynamics.

Aug. 2008 – Sept. 2012 | **Seismic Interpreter** | PDVSA (Venezuelan Oil Company)

- As part of a multidisciplinary team, my main responsibility was to evaluate and to discover new plays and prospects by implementing the interpretation of 2D and 3D seismic data of different structural settings.

TEACHING AND SUPERVISING:

- Teaching assistant: course of Geofluid Reservoirs (2015/2016) at University of Camerino.
- Teaching assistant (laboratory and field): course of Seismic Methods (2006-2007) at Central University of Venezuela.
- Co-supervisor of 6 graduate (English) and 1 undergraduate (Italian) theses at the University of Camerino.

COMPUTING SKILL:

- Seismic Interpretation and Fracture Modelling software: Landmark, Petrel, Move.
- Programming in C++
- Fluid flow simulation software: Palabos
- Photogrammetry: Agisoft Photoscan
- Image analysis software: ImageJ, Pore3D

PERSONAL SKILLS:

- Good verbal and writing communication skills, teaching and multidisciplinary teamwork.
- Languages: **Spanish** (mother tongue), **English, Italian**.
- Volunteer activities as Firefighter (2002-2008) at the fire department of University Central of Venezuela.
- Driving licence B

AWARDS:

- First place of “Petroleum Geology Student Contest”, 27th November 2015. Matera, Italy.
- Research grants (Dec.2015 and Sept. 2016) by the University of Camerino
